ADELCA Systems, LLC	Tennessee	USA	Robert Lee	owner	adelcasystems@comcast.net;	615-292-2774	We maintain inventory of raw material and some finished goods.	We provide "high performance dry wipes" made from nonwoven material such as spunlace fabric. These items are often sold to people that add their own chemicals and depending on which chemical is added, they COULD be "antimicrobial". Our products tend to be "industrial related" but depending on the application could be suitable for other uses. For instance - we offer "perforated centerpull wipes on a roll" that people put in their plastic bucket, add their chemicals to the bucket and now they have "pre-moistened wipes". I checked "towels" above just because some people request we cut "large sheets" so they can use them as a "disposable bath towel".
